Game Features

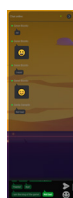

CRASH HISTORY

The Crash History feature lets you track recent crash multipliers in a live-updating bar at the bottom of the screen. Low multipliers are shown in red, while higher ones appear in green, making trends easier to identify.

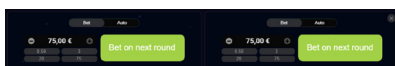

CHAT

Here, you can chat using preset phrases and emoticons, share your achievements and winnings, and view other players' views.

TWO BETS

LEADERBOARD

The Top 100 leaderboard ranks the best players based on their performance in the game. It includes filters for daily, monthly, and yearly rankings, allowing players to track their progress over different timeframes.

Rankings are determined by key factors such as the highest cashout multiplier and largest wins, highlighting the game's top-performing players.

LIVE BETS

In real-time mode, it shows players' bets and their profits for the round.

AUTO-PLAY

This feature lets players run the game without manual control. Players simply set the conditions for automatic launches and when they should stop.

AUTO CASH OUT

Automatically collects winnings without pressing the "cash out" button manually. Players just set the conditions for auto-collection.
