

COURIER SWEEPER

Courier Sweeper is a simple gamble game based on the beloved classic Minesweeper, where the player's goal is to go through the minefield to the end. In the game from Evoplay Entertainment, the player needs to take the donkey-courier to the final point. Each subsequent successful step increases the size of the winnings. The player can choose the size of the field, based on the preference for the height of the risk, and also withdraw money at any time before stepping the mine. Fantasy setting made the game even more fun and exciting. The uniquely well-designed interface allows you to quickly place or change bets without being distracted from the process!
