Game Features

SELECTION OF TEAMS

Choose your favourite team – each has a unique logo and national flag. Otherwise, your skin (a set of colour codes) is selected randomly. The batter and bowler always wear different colours to make the match feel authentic and dynamic.

VS POP-UP

Once you've picked your team, get ready for the showdown! A short animated screen (lasting 2-3 seconds) shows both teams, their logos, and national flags.

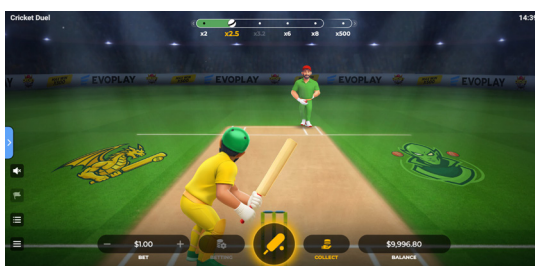

COLLECT

Collect your winnings by pressing the "Collect" button, and make your next move whenever you're ready. It is a strategic move, and you decide what strategy to choose.

CUMULATIVE BONUSES

Each successful hit brings you closer to greater rewards! Fill the progress bar with every winning shot to unlock higher multipliers from 15 available. Your potential winnings grow with each one, but so does the risk.
