

GOBLIN RUN

Welcome to the world of a third-person runner crash game - Goblin Run! A cute goblin, Gnos, wants to get his hands on the dragon's treasure, but it isn't going to give it away without a fight. Whilst collecting coins, the goblin runs away, escaping the dungeon, with the rampant wyvern, snapping at his heels.

3D graphics, a wide range of skins and game settings, 5 levels, as well as an up to 1000 multiplier, add fuel to the gameplay. The various traps available in Goblin Run don't interfere with its outcome but add excitement to the gaming process.

Come face to face with the dragon and try to steal its gold without this fierce creature eating you!

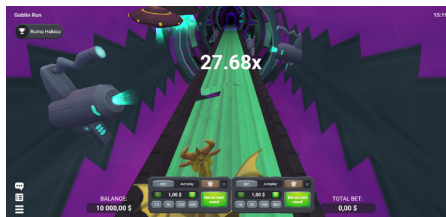

GOBLIN RUN

Game Features

BETS

A player places a bet on how far the goblin can run or chooses the range of bets. What's more important is that you can have multiple wins in one round with a Side bets feature!

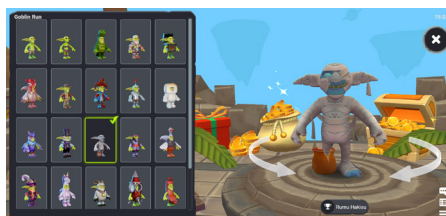

UNIQUE FORMULA

Our unique formula is valid for playing with low risks (early cash out) and those who like to take big risks. The maximum multiplier is x1000. The multiplier grows starting from 1, but there can be instant crashes at 0.

SKINS SHOP

Customize your hero and choose your favorite in-game skin to play with by clicking the "Change skin" button. The in-game skin is just a visual and it doesn't affect any gameplay features.

LEADERBOARD AND CHAT

Compete with other players in scoring the best result and get listed among the top 100 players or even lead the leaderboard. Feel free to share your results or communicate with other players via the in-game chat.
