

## RED QUEEN

---

Red Queen is an insta game where a player wins if he opens the Queen of Hearts after shuffling. It's as simple as that. Correct guess brings gambler a prize (an initial bet multiplied by x2.88).

First things first: set the bet amount from 50 to 10 000. Then click on a card you think might be a Queen. If your prediction is right, you win. If you open a Jack of Diamond or Jack of Clubs, you lose. Mute button, rules, and bet counter can be found in the dashboard at the bottom of the interface. Check out the History bets field to follow gaming process.

# Red Queen
